

Thank you for your interest in my photography!

I know you will not regret trusting Javi Photography for the most important events in your life. I feel it is my pleasure to document with art and to help tell the story that will live in your hearts for many many years to come.

My approach to photographing your family or portraits is to capture the emotion and moment as it happens. I believe a portrait's best relationship with art is in it's natural environment. So whenever possible, I shoot utilizing natural light.

Most of my shoots are done on-location or in-home where the natural lighting environment better captures your personality and character.

My approach to photographing your event is to capture the spontaneous moment with an artistic eye through my photojournalistic style while at the same time being as unobtrusive as possible. My goal is to capture the image and to create a masterful piece of art with it. To tell a story and create reminders of the feelings shared on that special occasion.

My photographic style for events is photojournalistic, illustrative, and traditional. Photojournalistic so you can see the events as they happen in your special day. Illustrative to be artful and mindful of how to depict different events. Traditional because I believe everyone should have formal traditional portraits proudly displayed in their home.

Please feel free to browse through the many images in my website and comment on the ones you like. I look forward to speaking with you soon!
